

....Screen Saver Readme.....

- * Run Exe Downloaded
 - * Download Screensaver and Install
 - * Open Screensaver Settings Dialog in Windows to Configure
- Works With All Version of Windows

* For Windows 10 *

You can get to your screensaver settings directly by typing 'Screen Saver' in the taskbar search box in the lower left corner of your system. Click on 'Change Screen Saver' and it will take you the Screen Saver settings right away where you can adjust the settings according to your own preferences.

If You have trouble opening screen saver settings in Windows 7/8/10 just Google it or Search Internet
