## **Background:**

I made this game for the TIGSource "A Game By Its Cover" competition, but didn't finish it time (damn real life...) It was inspired by the 'I am a Vegas Showgirl' box from the [Mightygodking](#) Blog and the traditional song 'Stack-O-Lee'.

The game was made using a beta version of [The Dog Adventure Game Engine \(DAGE\)](#). DAGE is a free engine designed to make 3D Adventure Games. Please give feedback or bug reports on the [Dageport Forums](#).

In case 3 is too many Ds for you, play my 2D pirate adventure [Nelly Cootalot: Spoonbeaks Ahoy!](#) If you have already played it: well done! Reward yourself with the biscuit or cookie of your choosing.
